報告者氏名：吉田 友美

所属：神戸大学経済学研究科博士後期課程

#### 概要

This paper reports the results of experimental study on private provision of public goods with uncertainty and without uncertainty. The result shows that the amount of contribution to public goods depends on individual characteristics. Individualists and risk lovers tend to more invest to public goods with or without uncertainty. Hierarchists tend to more invest to public goods with uncertainty. Fatalists tend to less invest to
